### Auditors' Report.

We have examined the accounts of selectmen, treasurer, tax collector, road agent, trustees of the public library, school treasurer, and find them correctly cast and properly vouched.

Archie A. Head.  
F. L. Gerald.  
C. A. Caswell.

## Report of School Board.

For the year ending Feb. 1911, six schools have been maintained. One at East Warren, one at the Summit, one at Ore Hill and three in the village. The general attendance has been good excepting through the winter term, when sickness has interfered more or less and cut down the average.

The enumeration of children last fall, taken as required by law reveals the following number of boys between the ages of 5 and 16, 62. Number of girls 67. Number between ages of 5 and 7 who do not regularly attend school 11. Number between ages of 8 and 14 who do not regularly attend school 2. Number between the ages of 14 and 16 who do not regularly attend school 2.

It has been the desire of the school board to give all the schools an equal chance both in the number of weeks schooling and in instruction. It has also been our aim to bring the grading of the various classes up to the standard of the State requirements.

In carrying out the recommendation of the board of last year, we have provided for a class in advanced work of those who had graduated from the regular grammar grade. Although handicapped in many ways this class has done very satisfactory work, and seems to justify the effort. The studies covered correspond to those of the Commercial course in the Plymouth High School. If this plan can be broadened to include at least two years of regular High School work in the Classical, Latin and English courses we believe it will be a positive step in advance for the benefit of our young people and consequently our town.

During the past year we have paid or are expected to pay tuition for ten students for all or part of the time, who have been attending High School out of town. The average tuition charge is about \$40.00 a year per student. It will be seen therefore that it might be of financial advantage to our town to furnish the extra room in our village school house and maintain a High School therein.

A large part of the difficulty heretofore experienced in heating the school house in the village has been overcome by re-setting the furnace.

The house at East Warren has been re-plastered and otherwise made more comfortable. Minor repairs at the Summit and at Ore Hill keep the property in fair condition.

Respectfully submitted,

H. N. MERRILL, FLORA M. COTTON, J. R. DINSMORE,	} School Board.
---	-----------------

---

## Board of Health Report.

Since the first of August we have had thirteen cases of typhoid fever. Eleven of them in the village. This has been at a cost of \$2,000.00 or thereabouts. The board of health have tried to learn the cause of the fever, but have been unable to with any degree of certainty. It is well known that the water in both ponds is polluted with sewage from dwelling houses. While water and ice from these ponds is not fit for family use it is not certain that it caused the fever we have had the past summer and fall, yet it is the most probable cause. There has been more typhoid fever all over New Hampshire the past summer and fall than for quite a number of years past. Ice has been cut from both ponds every year for a number of years until a year ago and yet we have not had any typhoid fever in the village for four or five years only what was traced to polluted wells.

The board of health made a mistake in the fall in not putting a stop to the sewers running into the ponds. Only a few complaints have been made

to the board of health only what has been said about the sewers and ponds, and for this reason no charge has been made against the town for services by the board of health.

The following letter is from the secretary of the state board of health.

CONCORD, N. H., Sept. 7, 1910.

F. L. GERALD,

Warren, N. H.

Dear Sir :

Your favor of Sept. 2nd received and contents noted. In reply, I would say that on general principles, a pond located in a village, as yours is, should be kept free from sewage, and certainly it should be if it is to be used as a source of an ice supply. I should certainly recommend excluding all sewage from the pond, on general principles, if for no other reason. Either all sewage must be kept out, or else your board should prohibit of ice from the pond for domestic use, as you have authority to do under the law.

Very truly yours,

IRVING A. WATSON, Secretary.
